WARNING (KV-32FX20U only)

The flexible mains lead is supplied connected to a **B.S. 1363** fused plug having a fuse of **5 AMP** capacity. Should the fuse need to be replaced, use a **5 AMP FUSE** approved by **ASTA to BS 1362**, ie one that carries the  mark.

IF THE PLUG SUPPLIED WITH THIS APPLIANCE IS NOT SUITABLE FOR THE OUTLET SOCKETS IN YOUR HOME, IT SHOULD BE CUT OFF AND AN APPROPRIATE PLUG FITTED. THE PLUG SEVERED FROM THE MAINS LEAD MUST BE DESTROYED AS A PLUG WITH BARED WIRES IS DANGEROUS IF ENGAGED IN A LIVE OUTLET SOCKET.

When an alternative type of plug is used it should be fitted with a **5 AMP FUSE**, otherwise the circuit should be protected by a **5 AMP FUSE** at the distribution board.

How to replace the fuse.
Open the fuse compartment with a screwdriver blade and replace the fuse.

21 pin connector (→ 1, ↔ 2/ → S 2)

Pin No	1	2	4	Signal	Signal level
1	○	○	○	Audio output B (right)	Standard level : 0.5V rms Output impedance : Less than 1kohm*

CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR THE CARBON PAINTED ON THE CRT, AFTER REMOVAL OF THE ANODE CAP

WARNING !!

AN ISOLATING TRANSFORMER SHOULD BE USED DURING ANY SERVICE WORK TO AVOID POSSIBLE SHOCK HAZARD DUE TO LIVE CHASSIS. THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE POWER LINE.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARKED  ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION

APRES AVOIR DECONNECTE LE CAP DE L'ANODE, COURT-CIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BLINDAGE DU TUBE CATHODIQUE.

ATTENTION !!

AFIN D'EVITER TOUT RISQUE D'ELECTROCUTION PROVENANT D'UN CHÂSSIS SOUS TENTION, UN TRANSFORMATEUR D'ISOLEMENT DOIT ETRE UTILISÉ LORS DE TOUT DÉPANNAGE. LE CHÂSSIS DE CE RÉCEPTEUR EST DIRECTMENT RACCORDÉ À L'ALIMENTATION SECTEUR.

ATTENTION AUX COMPOSANTS RELATIFS À LA SÉCURITÉ !!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE  SUR LES SCHÉMAS DE PRINCIPE, LES VUES EXPLOSÉES ET LES LISTES DE PIÉCES SONT D'UNE IMPORTANCE CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT, NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÉRO DE PIÉCE EST INDIQUÉ DANS LE PRÉSENT MANUEL OU DANS DES SUPPLÉMENTS PUBLIÉS PAR SONY.

BE-3E SELF DIAGNOSTIC SOFTWARE

The errors indicated below can be read using an Error Reader Display (Part Number S-188-900-10) connected to the service connector. Once an error has been detected it will then be displayed on the two digit error reader. During the power up procedure and during normal run time, the micro's self diagnostic procedures monitor for various errors. Errors displayed refer to the table indicated below.

Error Number	Error Description
00	No error (TV Error Reader shows 00 in normal condition)
01	Not allowed (may be confused with Sircs response flash on LED)
02	Protection circuit trip (OCP, OVP & No V-Sync)
03	Reserved for OVP (Included in error 2 for BE-3E)
04	Reserved for No V-Sync (Included in error 2 for BE-3E)
05	AKB
06	IIC Scl Low <Power Up only>
07	IIC Sda Low <Power Up only>
08	IIC Sda & Scl Low <Power Up only>
09	Jungle controller no acknowledge <Power Up only>
10	Video Switch (CXA2040) no acknowledge <Power Up only>
11	Tuner no acknowledge
12	MSP no acknowledge
13	NVM no acknowledge
14	AV switch (CXA2089) no acknowledge (DS20 & DX20)
15	Not used
16	Port Expander (CXA1875) no acknowledge (DS20 & DX20)
17	Not used
18	Dynamic Convergence (CXA8070) no acknowledge
19	Cannot Initialise jungle (after initial power on check OK) - <Chassis Initialisation>
20	Jungle controller response failure after power up check (+9V test)
21	Video Switch (CXA2040) cannot power on reset - <Chassis Initialisation>
22	Video Switch (CXA2040) response failiure after power up check (+9V test)
23	NVM acknowledge fail after initialisation (STBY +5V - same as micro!)
24	MSP run-time failure <May Not Be Fatal - Display On Error Reader>
25	DSP run-time failure <May Not Be Fatal - Display On Error Reader>
26	M3L bus Clock low time out after data send <Run-Time Failure>
27	M3L bus Clock low time out after data send <At Power Up Check>
28	M3L bus Clock low time out after data send <At Initialisation>
29	M3L Txd Low <Power Up Only>
30	M3L Rxd Low <Power Up Only>
31	M3L Enable Low <Power Up Only>
32	Compact Text test fail <Power Up Only>
33	Compact Text does not respond (+5V test)
34	Compact text run-time failure <May Not Be Fatal - Display On Error Reader>

Protection Error (Error 2):

Once every main loop (approximately 200ms OSD mode, 50ms text or menu mode), the micro checks the protection pin (pin 66). If the protection pin is high 6 successive times, a protection error is diagnosed. The protection pin is **not** checked during the first 3 - 4 seconds after AC on.

If this error is diagnosed, the respective NVM register will be updated and the set goes straight into diagnostic standby with 2 flashes - no reset is attempted.

AKB Error (Error 5):

Once every main loop the micro checks the AKB stability by reading the IKR return from the Jungle IC. IKR=1 means that the AKB is stable, IKR=0 means that the AKB is unstable. If the AKB status is unstable for 10 seconds, an AKB error is diagnosed. AKB stability is not checked during the first 20 seconds after AC switch on.

If this error is diagnosed, the respective NVM register will be updated and the response LED will flash 5 times continually, but the set will not go into standby mode. If the AKB status becomes stable, and remains stable for 10 seconds, the LED will stop flashing.

Startup Diagnostic Errors (Errors 6-18, 27, 29-32):

NVM	Error Description
6	SCL pin low
7	SDA pin low
8	Both SCL and the SDA pins are low
9	No acknowledge from the jungle (CXA2076)
10	No acknowledge from the video switch (CXA2040)
11	No acknowledge from the tuner
12	No acknowledge from the MSP
13	No acknowledge from the NVM
14	No acknowledge from the CXA2089 video switch (DS20 & DX20)
16	No acknowledge from the CXA1875 video Port Expander (DS20 & DX20)
18	No acknowledge from the Dynamic Convergence (CXA8070)
27	M3L_TXD pin low after Compact Text RAM test.
29	M3L_TXD pin low
30	M3L_RXD pin low
31	M3LEN pin low
32	Compact Text RAM test fail

If any of these errors are detected, the respective NVM register will be incremented. The software will then carry on with the power up sequence.

General IIC Device Run-time Errors (Errors 19-23):

NVM	Error Description
19	No acknowledge from Jungle when attempting to initialise.
20	No acknowledge from Jungle when attempting to read registers.
21	AV Switch cannot complete reset during initialisation.
22	No acknowledge from AV Switch when attempting to read registers.
23	No acknowledge from NVM when attempting to read or write.

If any of these errors are detected, the respective NVM register will be incremented and the software will carry on.

Compact Text Run-time Errors (Errors 26, 28, 33 & 34):

NVM	Error Description
26	M3L_TXD pin low when checking register 81 (implies that no communication was possible).
28	M3L_TXD pin low when attempting to initialise (implies that no communication was possible).
33	Compact Text RAM test failed during initialisation of devices.

In the case of these errors, the 'device reset' pin will be held low for 60ms, causing a hardware reset of Compact Text. Following this reset, a longer timeout will be allowed for the M3L bus to recover. If the error still exists, the NVM register will be incremented and the software will carry on.

NVM	Error Description
34	Register 81 check fail, but M3L_TXD pin high (implies that Compact Text has either reset or become corrupted).

In the case, the 'device reset' pin will be held low for 60ms, causing a hardware reset of Compact Text. Compact Text will then be re-initialised and the NVM counter updated. This is the same as for errors 26, 28 and 33 except that the M3L bus timeout is not changed.

MSP and DSP Run-time Errors (Errors 24 & 25):

NVM	Error Description
24	Error 24 can be caused by any of the following : - After MSP initialisation, Scart Prescale Register check fail (implies that the MSP has either reset or become corrupted). - MSP fails to acknowledge reset instruction. - Scart Prescale Register check fail (implies that the MSP has either reset or become corrupted).
25	- DSP test byte corrupted (implies that the MSP has either reset or become corrupted).

For both these errors, the software will refresh the MSP and DSP registers. If the errors still exist, the NVM counter will be incremented, and the software will carry on.

Error Display Mode

Error Display Mode is entered by the following sequence of commands :

Standby -> Information -> Digit 5 -> Volume Down -> TV

This mode will display a special menu, which will list all possible errors and the number of occurrences of each error (0 - 255, as stored in the NVM). There will also be a display of the current error (00 if no error). This display mode will appear as follows :

ERROR DISPLAY MODE			
Current Error Code = 00			
Error Code	Occurrences	Error Code	Occurrences
2	2	19	0
3	--	20	0
4	--	21	0
5	0	22	0
6	0	23	0
7	0	24	0
8	0	25	4
9	0	26	5
10	0	27	89
11	0	28	3
12	0	29	0
13	0	30	0
14	0	31	0
15	3	32	0
16	0	33	3
17	0	34	38
18	6		

Whilst in this mode, the number of occurrences of each error can be reset to 0 by following sequence of Sircs commands: Digit 8 -> Digit 0. 'TT08' will also reset this NVM data.

This mode can only be exited by switching off the TV.

The Current Error Code can also be read by using a TV Error Reader (IIC slave address 42H). This device simply receives 1 data byte, which is the error number in binary coded decimal form.

SECTION 1 GENERAL

The operating instructions mentioned here are partial abstracts from the Operating Manual. The page numbers of the Operating Instruction Manual remain as in the manual.

Overview

Overview of the remote control buttons

To mute sound

Press to mute TV sound. Press again to restore the sound.

To reveal on screen information

Press to reveal all on-screen indications. Press again to cancel.

To select channels

Press the numbered buttons to select channels.

For double digit programme numbers, e.g. 23, press **2** first, then the buttons **2** and **3**. If you enter an incorrect first digit, this should be corrected by entering another digit (0 - 9) and then selecting **2** again to enter the programme number of your choice.

To return to TV mode

Press to return to the normal operation from teletext mode or standby mode.

To select teletext

Press to switch on Teletext.

To display sound menu

Press to change the sound settings. Press again to remove the display.

To display picture menu

Press to change the picture settings. Press again to remove the display.

To adjust TV volume

Press to adjust the volume of the TV.

To temporarily switch off TV

Press to temporarily switch off TV. Press again to switch on TV from standby mode.

To save energy we recommend switching off completely when TV is not in use.

NOTE: After 15 -30 minutes without a TV signal and without any button being pressed, the TV switches automatically into standby mode.

To select input signal or freeze teletext

Press to select inputs from the TV sockets (see Using Optional Equipment section). In teletext mode, press to freeze the displayed page. Press once again to cancel.

To return to previous channel

Press to return to the previous channel you were watching. Note: This can be done only after watching the present channel for 5 seconds

To display the menu

Press if you wish to use the TV menu system. Press again to remove the menu from the TV screen.

To select menu items

Use the OK button and arrow keys to select the options available in the menu system of this TV.

To change screen format

Press to change the size of the screen.

This button has no function

To select channels

Press to select channels.

Quick Start Guide

6. Automatically tuning the TV

When you first switch on the TV, the following sequence of menu screens appear on the TV enabling you to 1) choose a language for the TV menu screens, 2) add channels to the TV, 3) arrange the channels.

- 1 When switching on the TV for the first time, the 'LANGUAGE' menu appears automatically on the TV screen enabling you to select in which language you wish to read the TV menu screens. Press the UP and DOWN arrow keys on the remote control to select your language then press the OK button to confirm your selection.

LANGUAGE	
<input type="radio"/>	English
<input checked="" type="radio"/>	Deutsch
<input type="radio"/>	Français
<input type="radio"/>	Italiano
<input type="radio"/>	Nederlands
<input type="radio"/>	Polskie
<input type="radio"/>	esky
<input type="radio"/>	Magyar
<input type="radio"/>	Ελληνικά

- 2 The 'AUTO TUNE' menu appears on the TV screen in your selected language. Press the UP and DOWN arrow keys to select 'YES' then press the OK button to confirm.

Do you want to start automatic tuning?	
<input checked="" type="radio"/>	Yes
<input type="radio"/>	No
Confirm: OK	

- 3 A new menu appears asking you to check that the antenna is connected. Ensure that the antenna is connected then press the OK button to confirm. The TV now starts to automatically search and store all available channels for you. Please be patient and do not press any buttons.

Please confirm that antenna is connected	
Confirm: OK	

- 4 When the TV has finished tuning in all available channels, the 'PROGRAMME SORTING' menu appears on the TV screen which enables you to change the channel order on your TV. If you wish to change the order of any of the TV channels, press the **PROG** +/- button on your remote control until the channel you wish to rearrange appears on the screen. Press the UP or DOWN arrow keys to select the new programme number position for your selected channel. Press the OK button to confirm. Repeat this procedure if you wish to change the order of other channels on your TV.

- 6 Press the **PROG** +/- or the numbered buttons on the remote control to view the TV channels.

Additional TV Features

Choosing a language for the TV menu screens

The TV consists of a menu system which can appear on screen in a variety of languages. Use the following feature to select the language that best suits you.

- 1 Press the MENU button on the remote control to display the menu on the TV screen.
- 2 Press the UP or DOWN arrow keys to select the  symbol on the menu screen then press the RIGHT arrow key to enter the 'PRESET' menu
- 3 Press the UP or DOWN arrow keys to select 'Language' on the menu screen then press the RIGHT arrow key to enter the 'LANGUAGE' menu.
- 4 Press the UP or DOWN arrow keys to select your chosen language.
- 5 Press the OK button to confirm your selection.
- 6 Press the MENU button to remove the display from the TV screen.

Additional TV Features

Re-arranging the TV channels

After automatically tuning the TV, you can use this feature to change the channel order. You may wish for example to exchange the channel on programme number 8 with the channel on programme number 4.

- 1 Press the MENU button on the remote control to display the menu on the TV screen.
- 2 Press the DOWN arrow key on the remote control to select the  symbol on the menu screen then press the RIGHT arrow key to enter the 'PRESET' menu.
- 3 Press the DOWN arrow key to select 'Programme Sorting' then press the RIGHT arrow key to enter the 'PROGRAMME SORTING' menu.
- 4 Press the UP or DOWN arrow keys to select the programme position of the channel you want to move (e.g. PROG 8) then press the OK button to confirm.
- 5 Press the UP or DOWN arrow keys to select the new programme position for your selected channel (e.g. PROG 4) then press the OK button to confirm. The two selected channels now exchange position.
- 6 Repeat steps 4 and 5 if you wish to sort other channels.
- 7 Press the MENU button to remove the menu from the TV screen.

Adjusting the picture

Although the picture is adjusted at the factory, you can modify it to suit your own taste.

- 1 Press the MENU button on the remote control to display the menu on the TV screen.
- 2 Press the UP or DOWN arrow key on the remote control to select the symbol on the menu screen then press the RIGHT arrow key to enter the 'PICTURE CONTROL' menu.
- 3 Press the UP or DOWN arrow keys to select the item on the screen you wish to adjust then press the RIGHT arrow key to confirm. For a description of the menu items and their effects, see the table underneath.
- 4 If you selected 'Picture Mode' or 'Format' in step 3, press the UP or DOWN arrow keys to select the item on the screen you wish to adjust then press the RIGHT arrow key to confirm.
- 5 Press the RIGHT or LEFT arrow keys to adjust your selected item.
- 6 As soon as you have adjusted the item, press the OK button to store the new setting.
- 7 If you selected 'Picture Mode' or 'Format' in step 3, press the LEFT arrow key to return to the 'PICTURE CONTROL' menu.
- 8 Repeat steps 3-7 to adjust the other items.
- 9 Press the MENU button to remove the menu from the TV screen.

Picture Mode	Picture Mode	◆ Personal (for individual settings)
		◆ Movie (for films)
		◆ Live (for live broadcasts)
	Brightness*	◆ Darker ◆ Brighter
	Colour*	◆ Less ◆ More
	Sharpness*	◆ Softer ◆ Sharper
	Hue**	◆ Greenish ◆ Reddish
Contrast		◆ Less ◆ More
Reset		Resets picture to factory preset levels
Format	Format	(refer to page 14 for details)
	Auto 16:9	◆ Off ◆ On

* Only if you select 'Personal' in 'Picture Mode'.

**Available for NTSC colour system only.

Changing picture and sound modes quickly

You can quickly change the Picture Mode or the Equalizer Mode without entering the 'PICTURE CONTROL' or the 'SOUND CONTROL' menu screens.

- 1 Press the symbol on the remote control for picture modes or the symbol for equalizer modes.
- 2 Press the UP or DOWN arrow keys to select the desired mode.
- 3 Press or again to remove the display from the TV screen.

Adjusting the sound

Although the sound is adjusted at the factory, you can modify it to suit your own taste.

- 1 Press the MENU button on the remote control to display the menu on the TV screen.
- 2 Press the DOWN arrow key on the remote control to select the symbol on the menu screen then press the RIGHT arrow key to enter the 'SOUND CONTROL' menu.
- 3 Press the UP or DOWN arrow keys to select the item on the screen you wish to adjust then press the RIGHT arrow key to confirm. For a description of the menu items and their effects, see the table underneath.
- 4 If you selected 'Sound Mode' in step 3, press the UP or DOWN arrow keys to select the item on the screen you wish to adjust then press the RIGHT arrow key to confirm.
- 5 Press the RIGHT or LEFT arrow keys to adjust your selected item.
- 6 As soon as you have adjusted the item, press the OK button to store the new setting.
- 7 If you selected 'Sound Mode' in step 3, press the LEFT arrow key to return to the 'SOUND CONTROL' menu.
- 8 Repeat steps 3-7 to adjust the other items.
- 9 Press the MENU button to remove the menu from the TV screen.

Sound Mode	◆ Personal ◆ Jazz ◆ Rock ◆ Pop
Balance	Less ◆ ◆ More
Reset	Resets picture to factory preset levels
Spatial	◆ On: volume level of the channels will stay the same ◆ Off: volume level changes according to the broadcast signal
Dual Sound	Stereo ◆ ◆ Mono (for a stereo broadcast) A for channel 1 ◆ ◆ B for channel 2 (for a bilingual broadcast)
Volume Offset	◆ The channel volume level can be adjusted over a range of -12 to +12
Headphones Volume Dual Sound	Less ◆ ◆ More Stereo ◆ ◆ Mono (for a stereo broadcast) A for channel 1 ◆ ◆ B for channel 2 (for a bilingual broadcast)

Additional TV Features

Manually fine tuning the TV picture

If the picture is distorted, you can manually fine-tune the TV to obtain a better picture reception.

- 1 Press the MENU button on the remote control to display the menu on the TV screen.
- 2 Press the DOWN arrow key to select the  symbol on the menu screen then press the RIGHT arrow key to enter the 'PRESET' menu.
- 3 Press the DOWN arrow key to select 'Further Programme Preset' then press the RIGHT arrow key to enter the 'FURTHER PROGRAMME PRESET' menu.
- 4 Press the UP or DOWN arrow keys to select the programme number you want to manually fine-tune.
- 5 Press the RIGHT arrow key repeatedly until the AFT column is highlighted.
- 6 Press the UP or DOWN arrow keys to fine tune the channel frequency over a range of -15 to +15.
- 7 Press the OK button to confirm.
- 8 Repeat steps 4 to 7 to fine-tune other channels.
- 9 Press the MENU button to remove the menu from the TV screen.

Teletext

Teletext

Teletext is an information service transmitted by most TV stations.

Switching Teletext on and off

- 1 When viewing channels, press a number button on the remote control to select the channel which carries the teletext service you wish to receive.
- 2 Press the  button on the remote control to switch on teletext.
- 3 Input three digits for the page number using the numbered buttons on the control. If you make a mistake, type in any three digits then re-enter the correct page number.
- 4 Press the  button to switch off teletext.

NOTE: Teletext errors may occur if the broadcasting signals are weak.

Using Other Teletext Functions

To superimpose teletext on to the TV

Press the  button on the remote control once in teletext mode or twice in TV mode to superimpose teletext on to the TV screen.
Press  button once more to cancel.

To Move to Next or Preceding Page

Press  or  on the control to select the previous or next page.

To Freeze a Teletext Page

Press  on the control to freeze the page. Press again to cancel the freeze.

Revealing concealed information (eg: answers to a quiz).

Press  to reveal information. Press again to conceal the information.

Using Fastext

(only available if the TV station broadcasts Fastext signals)
When the colour coded menu appears at the bottom of a page, press the colour button (green, red, yellow or blue) on the control to access the corresponding page.

Additional Information

Troubleshooting

Here are some simple solutions to problems which may affect the picture and sound.

Problem	Solution
No picture (screen is dark), no sound	<ul style="list-style-type: none">Plug the TV in.Press the button on the front of TV.If the indicator is on press / button or a programme number button on the remote control.Check the aerial connection.Check that the selected video source is on.Turn the TV off for 3 or 4 seconds and then turn it on again using the button on the front of the TV.
Poor or no picture (screen is dark), but good sound.	<ul style="list-style-type: none">Using the MENU system, select the Picture Control and Picture Mode displays. Adjust the contrast, brightness, and colour levels.From the Picture Control display select RESET to return to factory settings.
Poor picture quality when watching a RGB video source.	<ul style="list-style-type: none">Press the button repeatedly on the remote control until the RGB symbol is displayed on the screen.
Good picture, no sound	<ul style="list-style-type: none">Press the +/- button on the remote control.If is displayed on the screen, press the button on the remote control.
No colour on colour programmes	<ul style="list-style-type: none">Using the MENU system, select the Picture Mode display. Adjust the the colour level setting.From the Picture Control display select RESET to return to factory settings.
Distorted picture when changing programmes or selecting teletext	<ul style="list-style-type: none">Turn off any equipment connected to the 21 pin Euro connectors on the rear of the TV.
Remote control does not function	<ul style="list-style-type: none">Replace the batteries.
The standby indicator on the TV flashes	<ul style="list-style-type: none">Contact your nearest Sony service centre.

- If you continue to have these problems, have your TV serviced by qualified personnel.
- NEVER open the casing yourself.

SECTION 2 DISASSEMBLY

2-1. REAR COVER REMOVAL

2-2. CHASSIS ASSY REMOVAL

2-3-1. SERVICE POSITION (1)

① Snap off from main bracket

2-3-2. SERVICE POSITION (2)

① Clip bracket into Beznets

2-4. WIRE DRESSING

2-5. A BOARD REMOVAL

① Remove CN301 before removing A board

2-6. A EXTENSION BOARD

2-7. PICTURE TUBE REMOVAL

• REMOVAL OF ANODE-CAP

Note : Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield or carbon paint on the CRT, after removing the anode.

* REMOVING PROCEDURES.

• HOW TO HANDLE THE ANODE-CAP

- ① To prevent damaging the surface of the anode-cap do not use sharp materials.
- ② Do not apply too great a pressure on the rubber, as this may cause damage to the anode connector.
- ③ A metal fitting called a shatter hook terminal is fitted inside the rubber cap. Do not turn the rubber foot over excessively this may cause damage if the shatter hook sticks out.

REMOVAL AND REPLACEMENT OF THE MAIN-BRACKET BOTTOM PLATES.

(1) REMOVING THE PLATES

In the event of servicing being required to the solder side of the D Board printed wiring board, the bottom plates fitted to the main chassis bracket require to be removed.

This is performed by cutting the gates with a sharp wire cutter at the locations indicated by arrows.

Note : There are 4 plates fitted to the main bracket and secured by 6 gates.
Only remove the necessary plate to gain access to the printed wiring board.

For safety reasons, on no account should the plates be removed and not refitted after servicing.

(2) REFITTING THE PLATES

Because the plates differ in size it is important that the correct plates are refitted in their original location.

The plates are identified by numerical markings on their top side e.g. 1,2

1. Identify the plate by locating its marking.
2. Rotate the plate through 180° (do not flip over).
3. Locate the corresponding numerical markings indicated on the main chassis. See Fig 2.
4. Refit the plate as indicated in Fig 3 with the markings located next to each other.

In the event of the plates requiring to be removed at a later stage, this can be achieved by inserting a screwdriver in the snap-recess indicated as in Fig 4 and lifting out.

SECTION 3 SET-UP ADJUSTMENTS

- When complete readjustment is necessary or a new picture tube is installed, carry out the following adjustments.
- Unless there are specific instructions to the contrary, carry out these adjustments with the rated power supply.
- Unless there are specific instructions to the contrary, set the controls and switches to the following settings:

Contrast normal

Brightness normal

Carry out the following adjustments in this order:

- 3-1. Beam Landing
- 3-2. Convergence
- 3-3. Focus
- 3-4. White balance

Note: Test equipment required

1. Color bar/pattern generator.
2. Degausser.
3. Digital multimeter.
4. Oscilloscope.

3-1. BEAM LANDING

Preparation:

1. In order to reduce the influence of geomagnetism on the set's picture tube, face it in an easterly or westerly direction.
2. Switch on the set's power and degauss with the degausser.

(1) Adjustment of Correction Magnet for Y-Splitting Axis

1. Input a crosshatch signal from the pattern generator.
2. Set the Picture control to minimum and confirm that the Brightness control is set to normal.
3. Position the neck assembly as indicated in Fig.3-2.
4. Move the deflection yoke as far forward as is possible.
5. Adjust the upper and lower pin symmetrically by opening or closing the Y-splitting axis correction magnets located on the neck assembly.
6. Return the deflection yoke to its original position.

Caution :

High voltages are present on the Deflection yoke terminals - take care when handling the Deflection yoke whilst carrying out adjustments.

(2) Landing

Note : Before carrying out the following adjustments adjust the magnets as indicated below [See Fig.3-3].

1. Input an all-white signal from the pattern generator. Maximize the picture setting and adjust the Brightness setting.
2. Rough-adjust the focus and horizontal convergence.
3. Loosen the deflection yoke screws and align the purity adjustment knob to its central position. [See Fig.3-1].
4. Switch from the all-white pattern to an all-green pattern.
5. Move the deflection yoke backwards and adjust with the purity magnet so that the green is at the centre and it aligns symmetrically. [See Fig.3-4].
6. Move the deflection yoke forward and adjust so that the entire screen becomes green.
7. Switch the raster signal to red, then to blue and verify the landing condition.
8. When the position of the deflection yoke has been determined, fasten the deflection yoke with the screw.
9. If the beam does not land correctly in all the corners of the screen, use magnets to correct it. [See Fig.3-5].

Fig.3-4

Fig. 3-5

3-2. CONVERGENCE

(1) Screen centre convergence [Static convergence]

1. Input a dot signal from the pattern generator. Normalize the picture setting.
2. [Moving horizontally], adjust the H.STAT control so that the horizontal red, green and blue dots coincide at the centre of the screen.
3. [Moving vertically], adjust the V.STAT magnet so that the vertical red, green and blue dots coincide at the centre of the screen.

- If the horizontal dots are unable to coincide with the variable range of the H.STAT convergence, adjust together with the V.STAT convergence while tracking.
[Adjust the convergence by tilting the V.STAT convergence or by opening and closing the V.STAT convergence.]

4. Movement of the red, green and blue dots by tilting the V.STAT magnet and by opening or closing the V.STAT magnet.
- a). By opening or closing the V.STAT magnet, the red, green and blue dots move as indicated below.

- b). By rotating the V.STAT magnet counter clockwise, the red, green and blue dots move as indicated below.

- c). By rotating the V.STAT magnet clockwise, the red, green and blue dots move in the direction indicated below.

- d). By opening or closing the V.STAT magnet, the red, green and blue dots move in the direction indicated below.

Note : If the blue dot does not coincide with the red and green points correct the points by using the BMC [Hexapole] magnet.

5. Correction for HMC [horizontal mis-convergence] and VMC [vertical mis-convergence] by using the BMC [Hexapole] magnet.

- a). HMC correction by BMC [Hexapole] magnet and movement of the electron beam.

HMC correction(A)

HMC correction(B)

- b). VMC correction by BMC [Hexapole] magnet and movement of the electron beam.

VMC correction(A)

VMC correction(B)

HAMP

6. HTIL correction can be performed by adding a THL correction ASSY to the DY.

HTIL

LAYOUT OF EACH CONTROL

Fig 3-6

Note : If you are unable to adjust the corner convergence properly, this can be corrected with the use of permalloys.

3-3. SCREEN (G2)

SCREEN G2 ADJUSTMENT

1. Input a dot signal from the pattern generator.
2. Set the Picture, Brightness and Colour to minimum.
3. Apply 175V DC from an external power supply to the R, G and B cathodes of the CRT.
4. Whilst watching the picture, adjust [SCREEN G2] located on the FBT [flyback transformer] to the point just before the flyback return lines disappear.

3-4. FOCUS

1. Receive a television broadcast signal.
2. Normalise the picture setting.
3. Adjust the focus control located on the FBT [flyback transformer] to obtain the best focus at the centre of the screen. Bring only the centre area of the screen into focus, the magenta-ring appears on the screen. In this case, adjust the focus to optimize the screen uniformly.

3-5. WHITE BALANCE

WHITE BALANCE ADJUSTMENT

1. Input an all white signal from the pattern generator.
2. Enter into the Service Mode.
3. Enter into the 'Picture Adjustment' service menu.
4. Select 'Sub contrast' and adjust to 7.
5. Select the 'Green drive' and adjust so that the white balance becomes optimum.
6. Select the 'Blue drive' and adjust so that the white balance becomes optimum.
7. Press the 'TV' button on the remote commander to return to TV operation.

SECTION 4 CIRCUIT ADJUSTMENTS

4-1. ELECTRICAL ADJUSTMENTS

Service adjustments to this model can be performed using the supplied Remote Commander RM-887.

HOW TO ENTER INTO SERVICE MODE

1. Turn on the main power switch and enter into the stand-by mode.
2. Press the following sequence of buttons on the Remote Commander.

- 'TT--' will appear in the upper right corner of the screen. Other status information will also be displayed.
3. Press 'MENU' on the remote commander to obtain the following menu on the screen.

TEST MENU

> Picture Adjustment

SUB BRIGHTNESS ADJUSTMENT

1. Input a Phillips pattern.
2. Set the picture control to minimum.
3. Enter into the 'Picture Adjustment' service menu.
4. Adjust the 'Sub-Brightness' data so that there is barely a difference between the 0 IRE and 10 IRE signal levels.

SUB CONTRAST ADJUSTMENT

1. Input a video that contains a small 100% area on a black background.
2. Set the picture control to maximum.
3. Connect an oscilloscope to Pin 3 of CN301 [A Board].
4. Enter into the 'Picture Adjustment' service menu.
5. Adjust the 'Sub-contrast' data to obtain a black to white amplitude of 2.20V.

SUB COLOUR ADJUSTMENT

1. Receive a PAL colour bar video signal.
2. Connect an oscilloscope to Pin 3 of CN301 [A Board].
3. Enter into the 'Picture Adjustment' service menu.
4. Adjust the 'Sub-colour' data so that the Cyan, Magenta and Blue colour bars are of equal height

Note: The data indicated in the 'TV STATUS' table is dependant on destination, screen size and country.

SYSTEM B/G, D/K, I & L I.F. ADJUSTMENT

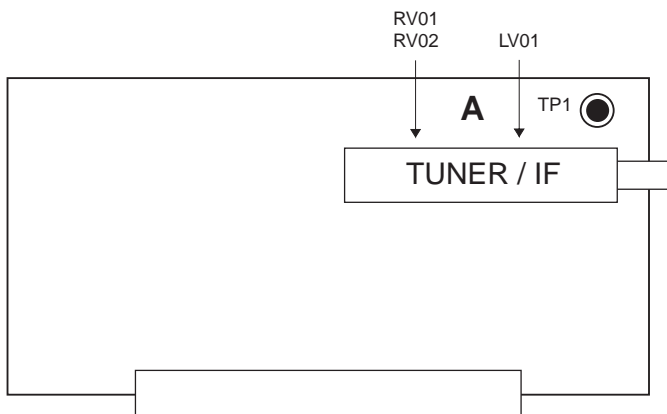

1. Input an off air signal of between 60-100dBuV / 75 ohm terminated, via the tuner socket.
2. Enter into the 'IF Adjustment' service mode [i.e 'TT59'] to fix the I.F frequency to 39.9MHz.
3. Enter into the service mode and select 'Current TV status'.
4. Adjust the I.F coil [LV01] until the 'AFT Status' indicates a 'Window' condition.

SYSTEM L BAND 1 I.F. ADJUSTMENT

1. Input an off air signal of between 60-100dBuV / 75 ohm terminated, via the tuner socket.
2. Enter into the 'IF Adjustment' service mode [i.e 'TT59'] to fix the I.F frequency to 34.2MHz.
3. Enter into the service mode and select 'Current TV status'.
4. Adjust the RV02 control until the 'AFT Status' indicates a 'Window' condition.

TUNER AGC ADJUSTMENT

1. Receive a signal of 63dBuV / 75 ohm terminated, via the tuner socket.
2. Measure the voltage at test point 1 [A Board].
3. Adjust RV01 control to obtain a voltage of 3.0V +/- 0.3V.

DEFLECTION SYSTEM ADJUSTMENT

1. Enter into the 'Geometry Adjustment' service menu.
2. Select and adjust each item in order to obtain the optimum image.

5-1 BLOCK DIAGRAMS (2)

5-2. CIRCUIT BOARD LOCATION

5-3. SCHEMATIC DIAGRAMS AND PRINTED WIRING BOARDS

- Note :**
- All capacitors are in μF unless otherwise noted.
 - pF : μF 50WV or less are not indicated except for electrolytic types.
 - Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch : 5mm
Electrical power rating : 1/4W

- Chip resistors are 1/10W
- All resistors are in ohms.
 $k = 1000 \text{ ohms}$, $M = 1000,000 \text{ ohms}$

- : nonflammable resistor.
- : fusible resistor.
- : internal component.
- : panel designation or adjustment for repair.

- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- All voltages are in Volts.
- Readings are taken with a 10Mohm digital multimeter.
- Readings are taken with a color bar input signal.
- Voltage variations may be noted due to normal production tolerances.

- : B + bus.
- : B - bus.
- : RF signal path.
- : earth - ground.
- : earth - chassis.

SECTION 6 EXPLODED VIEWS

NOTE :

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remarks column.
- Items marked “*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

Note : Les composants identifiés par une trame et par une marque Δ sont d'une importance critique pour la sécurité. Ne les remplacer que par des pièces du numéro spécifié.

Note : The components identified by shading and marked Δ are critical for safety. Replace only with the part numbers specified in the parts list.
